MHS 2000

The powerful multi-purpose dicers MHS 2000 are the multi-talented performers for the butchery trade, supermarkets and food manufacturing companies. Ideal for cutting cubes, the most delicate strips and slices of sausage products and meat, as well as vegetables and lots of other products. The dual chamber system enables simultaneous loading and slicing.

PRODUCTIVITY

- MHS 2000: up to max. 2000 kg/h
- Up to 800 slices/minute
- Automatic start when closing the horizontal slider

SLICING RESULTS

- Choice of clocked or continuous feeding
- Adjustable horizontal compression
- Reinforced grid with 4x suspension for hardest workload
- 4-side pre-compression for the very best slicing quality when processing fresh meat and bacon

With manual operation or via touch display

VERSATILITY

- Optional lift for E-boxes
- Uses slicing discs for cutting slices and strips
- Special cheese grating for processing cheese
- Comprehensive range of accessories (see page 16)

HANDLING

- Readiness indicator for loading the machine
- Dual chamber system with simultaneous machine loading and slicing
- Ergonomical one-handed operation of the horizontal slider
- Outfeed belt for discharging product in 200 litre trolleys or containers of your choice
- Product discharged in 200 litre trolleys, Machine on pedestal
